

This is a second sample PDF for testing a Document Question Answering system.

Cloud Computing is the delivery of different services through the Internet, including data storage, servers, databases, networking, and software. It allows businesses and individuals to access and store data without managing physical servers.

Big Data Analytics is the process of examining large and varied data sets to uncover hidden patterns, correlations, and other insights. It enables organizations to make informed decisions and improve their operations.

Popular cloud providers include Amazon Web Services (AWS), Microsoft Azure, and Google Cloud Platform (GCP).
